

**AL SACWIS Project**  
**Dept. of Human Resources**  
Requirements Traceability Matrix

Req #	Category	Finalized Requirement Description	Status	Validation Date	Base System Functional Component		
					Module	SubModule	Program Specification
SR5.233	SR5 Forms and Correspondence	The system must generate a Home Study Form document with pre-filled data from the system where applicable.	Validated	4/4/2008	Reports	Online Reports	PR-SF-HomeStudy
SR5.232	SR5 Forms and Correspondence	The system must generate a Visitation Plan Form document with pre-filled data from the system where applicable.	Validated	4/4/2008	Reports	Online Reports	CMF-SF-VisitationPlan
SR5.234	SR5 Forms and Correspondence	The system must produce a Disbursement Form document with pre-filled data from the system where applicable.	Validated	4/4/2008	Reports	Online Reports	DisbursementForm
SR1.9	SR1 Technical	The system must provide the ability to "cut and paste", with word processing activities i. Font Style, Font Size , Font Weight ( Bold/Normal) , Font Decoration , Font Color from Office applications into system narratives and vice versa.	Validated	3/22/2007	Common Functions	User Control	ClientContact.aspx
SR1.10	SR1 Technical	The system must provide the ability in narratives to perform the word processing activities spell checking and font change. Font change must support font face, size, bold, italic, underline, and any web safe color.	Validated	3/22/2007	Common Functions	User Control	SpellChecker.aspx
SR1.12	SR1 Technical	The system must provide a method for broadcasting messages for relevant notices to all users or logical sub-sets of users affected by a change. (e.g. users statewide or users in particular site).	Validated	3/23/2007	Common Functions	Alerts	IntakeReportList.aspx
SR1.12	SR1 Technical	The system must provide a method for broadcasting messages for relevant notices to all users or logical sub-sets of users affected by a change. (e.g. users statewide or users in particular site).	Validated	3/23/2007	Common Functions	Alerts	FinanceReportList.aspx
SR1.12	SR1 Technical	The system must provide a method for broadcasting messages for relevant notices to all users or logical sub-sets of users affected by a change. (e.g. users statewide or users in particular site).	Validated	3/23/2007	Common Functions	Alerts	ProviderReportList.aspx
SR1.12	SR1 Technical	The system must provide a method for broadcasting messages for relevant notices to all users or logical sub-sets of users affected by a change. (e.g. users statewide or users in particular site).	Validated	3/23/2007	Common Functions	Alerts	CaseReportList.aspx
SR1.13	SR1 Technical	This requirement was deleted per State's request.	Validated	3/23/2007	Common Functions	User Control	N/A
SR1.14	SR1 Technical	This requirement was deleted per State's request.	Validated	3/23/2007	Common Functions	Search	N/A
SR1.16	SR1 Technical	Individual fixed size online forms and correspondence must display on screen in utilizing the following tiers: 1-30 pages: less than 120 seconds for 95% of all requests 31-40 pages: less than 180 seconds for 95% of all requests 41 or more pages: excluded from performance measurements  The listed tiers exclude responsibility for network related performance issues.	Validated	3/23/2007	Performance	Performance	FinanceReportList.aspx

Req #	Category	Finalized Requirement Description	Status	Validation Date	Base System Functional Component		
					Module	SubModule	Program Specification
SR1.16	SR1 Technical	Individual fixed size online forms and correspondence must display on screen in utilizing the following tiers: 1-30 pages: less than 120 seconds for 95% of all requests 31-40 pages: less than 180 seconds for 95% of all requests 41 or more pages: excluded from performance measurements	Validated	3/23/2007	Performance	Performance	CaseReportList.aspx
SR1.16	SR1 Technical	The listed tiers exclude responsibility for network related performance issues. Individual fixed size online forms and correspondence must display on screen in utilizing the following tiers: 1-30 pages: less than 120 seconds for 95% of all requests 31-40 pages: less than 180 seconds for 95% of all requests 41 or more pages: excluded from performance measurements	Validated	3/23/2007	Performance	Performance	ProviderReportList.aspx
SR1.16	SR1 Technical	The listed tiers exclude responsibility for network related performance issues. Individual fixed size online forms and correspondence must display on screen in utilizing the following tiers: 1-30 pages: less than 120 seconds for 95% of all requests 31-40 pages: less than 180 seconds for 95% of all requests 41 or more pages: excluded from performance measurements	Validated	3/23/2007	Performance	Performance	IntakeReportList.aspx
SR1.19	SR1 Technical	The listed tiers exclude responsibility for network related performance issues. The system must provide an intuitive editing and validation function to force the immediate correction of any data entry errors. The following error management techniques will be utilized to provide more intuitive editing and validation function. 1) Mandatory fields will have specific error message language to identify the field in error 2) Conditional business logic errors will occur earlier in the business process to avoid allowing the user from entering data in a screen that requires data entered in by other screen or area in the system. 3) Data grid refresh. When user can edit or add multiple records on a single screen, the data grid should refresh with newly entered record and highlight/put focus on newly entered row.	Validated	3/23/2007	Common Functions	Error Management	ErrorMsgMaintenance.aspx
SR1.22	SR1 Technical	The system solution must include the conversion of data from the following systems: Adoption Subsidy Payroll (ASP) State Tracking; Accounting and Claiming System (STAC); Alabama Social Service Information System (ASSIST); Federal Claiming Billing System (FCBS); Family Service System (FSS); Alabama Child Welfare Information System (ACWIS), including the Provider, Client, Payment, Support and Adoption subsystem databases; ICPC; Severely, Emotionally, Behaviorally Disordered; Putative Father; and Child Death System.	Validated	3/20/2007	Conversion	Conversion	sp_tllntkfromASSIST
SR1.22	SR1 Technical	The system solution must include the conversion of data from the following systems: Adoption Subsidy Payroll (ASP) State Tracking;	Validated	3/20/2007	Conversion	Conversion	sp_tllntakeRoles
